TEKNO

L’importante è non porsi mai dei limiti.
Le idee vengono a chi ha conoscenza,
esperienza e soprattutto curiosità.
Un concetto che si esprime nel modo migliore
con una parola ereditata dal greco antico,
TEKNE (Τέχνη), letteralmente “il saper fare”.
Da qui parte tutto ciò che riguarda ricerca e sviluppo
per diventare poi TECNOLOGIA, quale espressione
dell’esperienza e della conoscenza che finalmente
viene messa a disposizione di tutti.

Ecco come nasce questa nuova collezione di Stile, geometria e linee che si fondono insieme ai nuovi gusti estetici e alla ricerca di nuove combinazioni decorative. Si ricerca linearità, sinonimo di coerenza, pulizia e ordine da mettere in combinazione con fantasia, sperimentazione e immaginazione.
Logica e irrazionalità che si fondono per decorare ambienti residenziali o commerciali, dove la vita scorre continuamente miscelando l'agire, il pensiero, e il sentimento.

TÉXNE

Oggi tutto è fluido,
si sono persi gli schemi tradizionali
di organizzazione e visione del futuro.

TEKNE vuol guidare questo flusso
mettendo in luce il particolare
per raggiungere l’universale!
